

Social and Native Advertising for Modern Marketers

Manage ad experiences on Facebook, Google, Twitter, Outbrain, Taboola and more

Ensure social and native advertising supports an omni-channel messaging strategy to resonate with customers and prospects throughout their buying journey.

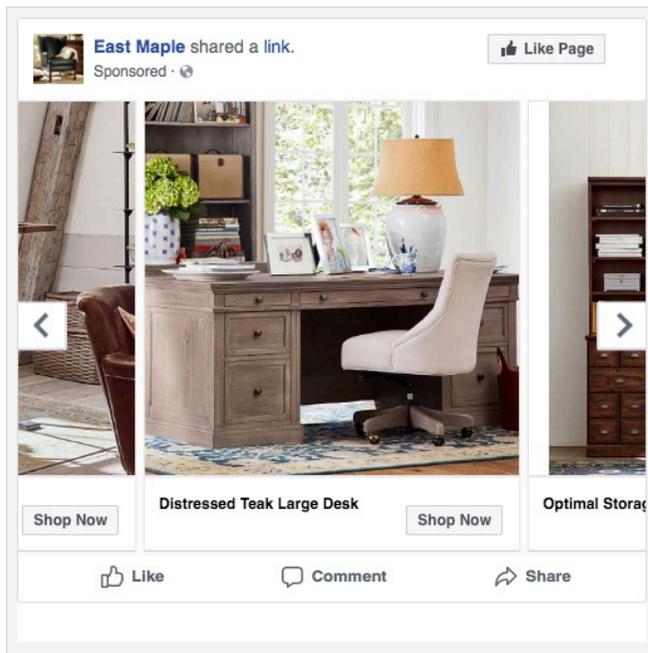

LEAD THE CONVERSATION WITH LITTLE EFFORT

Social media moves fast and doesn't wait for your brand to catch up. Deliver messaging that's always a part of the conversation with RevJet's ability to easily and quickly assemble new creative and to produce multiple versions that power continual experimentation. In addition, leverage RevJet's dynamic personalization technology to maximize relevance and drive impact with your social and native audiences. Personalize ad creatives on a granular basis based on real-time data- triggers like weather, time-of-day or user demographics. Use existing product catalog images to create a personalized shopping experience in social feeds.

WHY REVJET FOR SOCIAL AND NATIVE

A summary for those with little time

Integrate social into an omni-channel creative strategy.

Execute "pre-optimized" creative, leveraging learning from other channels.

Enhance personalization with real-time data triggers.

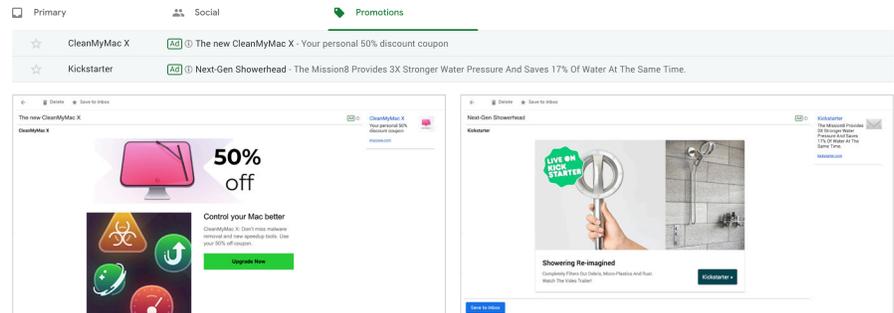

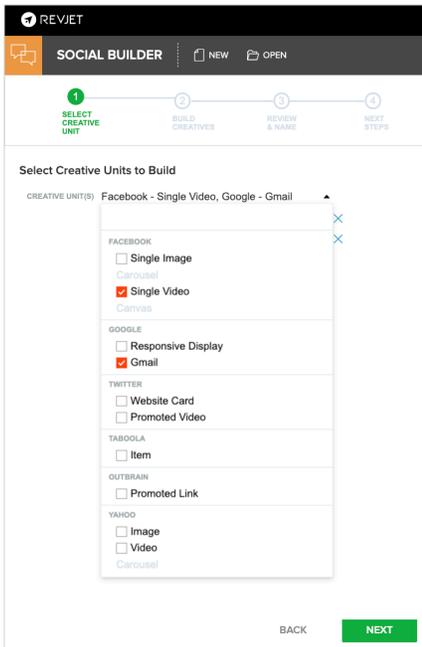

View creative performance insights across social campaigns in one dashboard.

Build and manage creative for Facebook/Instagram, Google, Twitter, Outbrain, Verizon-Yahoo, and Taboola.

BUILD ONCE, RUN EVERYWHERE

With RevJet, it's easy to build creative for each of the major social and native platforms all at once, eliminating the need to work in each platform separately. RevJet clients save valuable time by building a single creative to deliver into the top platforms including Facebook, Twitter, Google, Taboola, Outbrain, and Verizon Media. It's also simple to iterate and customize creative by platform, all through a single, user-friendly interface.

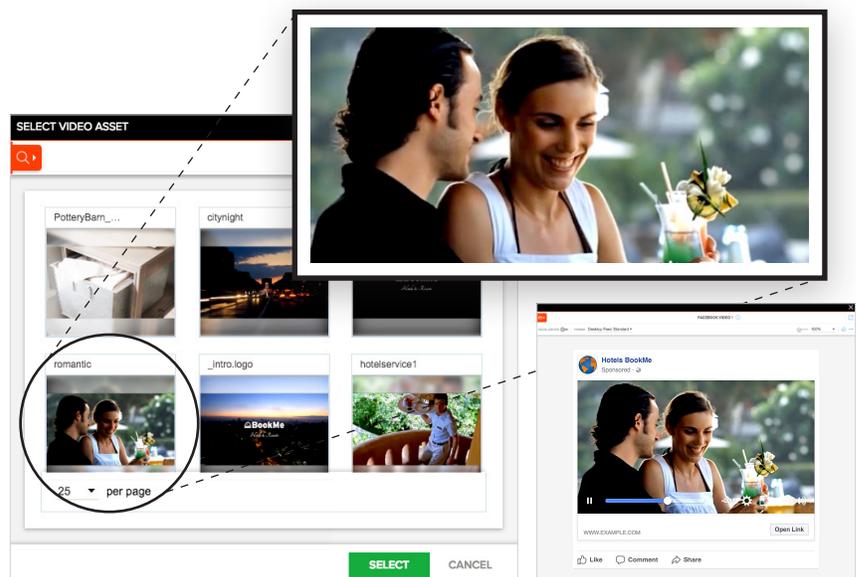

PORT ASSETS, STRATEGIES AND LEARNINGS FOR CREATIVE RESONANCE ACROSS CHANNELS

RevJet's Ad Experience Platform enables marketers to leverage learning from other media channels to "pre-optimize" social and native campaigns and jump-start success. With RevJet, marketers can simply apply the best performing creatives and assets and port learnings from display and video campaigns to social and native campaigns.

RevJet even provides the technology to adapt in-stream or out-stream video to social and native formats with customizable animation and messaging capabilities, ensuring a unified (but channel-optimized) user-experience across all video channels on the media plan.

Our proprietary Experience Group structure efficiently manages the strategies for multiple creatives across social and native platforms in a user-friendly format. This allows for high-velocity and methodical optimization among audiences and personalized creative experiences. RevJet monitors vital performance data including clicks and engagements and automatically pauses or scales creatives, effectively boosting campaign performance with no incremental media spend.

UNCOVER ACTIONABLE INSIGHTS FROM ALL SOCIAL AND NATIVE PLATFORMS IN ONE CONSOLIDATED VIEW

On-demand social and native creative and performance data is finally available in one place for a comprehensive picture of campaign health. Marketers easily understand performance across Experience Groups and campaigns within each platform in order to gain insight and to take action.

WITH REVJET YOU CAN

- Make data-driven decisions with metrics from every creative, experiment, flight, and campaign on every channel.
- Easily visualize and share results with key stakeholders to align the organization and make timely optimizations.
- View a user-friendly dashboard that highlights creative evolution, assets, tests, and results for multiple channels across campaigns.
- Never miss a shift in traffic patterns with custom alerts delivered to a campaign manager's inbox.

The dashboard provides a comprehensive overview of campaign performance. It includes sections for Optimization Groups (11), Flights (19), and Confirmed Learnings (24). Key performance indicators show 7.4mm impressions and 4.1k goal events. Performance metrics indicate an 85.5% average in-flight lift and a 117% creative boost. The dashboard also features a grid of creative assets, including paused and launched creatives, with detailed performance data for each.
